ABOUT TECHSEC

TechSec is the Institute's Technology and Security Initiative. We are interested in the domains of cybersecurity and Internet governance. We cover anything related to the Internet, new technologies and cyberspace which fascinate us! Eg. last year we had events on freedom of speech on the Internet, Internet shutdowns and cybersecurity.

Apart from engaging academically with these issues, we also believe in the importance of knowing and mastering new technologies and the online world.

Technology is our future, don't stay behind!
